

Jar Candle Wraps

by Sherry Titzer
<http://www.atimetostitch.com>

Wrap 1 (front) - 4.2"H x 6.95"W Wrap 2 (back) - 3.7"H x 6.95"W

Supplies:

Vilene or Aqua Magic to fit your hoop

Fabric - 4 pieces 5" x 8" (2 pieces for lining)

Fusible Interfacing - 2 pieces 4 1/2" x 8" (iron to back of lining fabric - use only if lining fabric is thin)

Fusible Fleece - 2 pieces 4 1/2" x 8" (iron to back of outer fabric)

Note: I used Pellon fusible fleece & Pellon light weight fusible interfacing

1. Cut your fabric, interfacing and fleece to size.

2. Iron fleece/interfacing to wrong side of fabric leaving 1/2" fabric showing at the top. Fold the 1/2" fabric down over the interfacing/fleece and iron to crease.

3. Stitch the 1st color in design on stabilizer only. Next, fold fabric (fleece on back) in half & line up the fold with the center mark on placement line. Unfold fabric, tape at corners keeping the turned edge even with basting line.

4. Put hoop on machine. The 2nd color in the design tacks the fabric & fleece down. (also top stitches turned/folded edge on the left side)

5. Finish stitching the design front until the instructions tell you it's time to add the lining.

6. Remove hoop. Place lining fabric centered over outline keeping turned edge even with placement line on the left side again (just like the front piece).

7. The next color stop in the design tacks the lining fabric down (top stitches the turned/folded edge again)

8. Remove hoop and trim the excess fabric around design on both sides of hoop. Put hoop back on machine.

9. The last color in the design stitches the satin edge.

10. Trim design from stabilizer. Run wet rag along edge to dissolve remaining stabilizer.

11. Make the back half of the candle wrap following the same instructions above.

12. Place the front and back candle wrap pieces right sides together and pin at the side seams.

13. Stitch the sides together on your sewing machine with a short stitch length. Stitch right next to satin stitches.

Turn right side out and your finished!

Mainstays jar candle from Walmart

(Label on bottom of jar)

These candle wraps were designed to fit 20 oz jar candles (or shorter jars with the same jar circumference). The candle jar shown above were purchased at Wal-Mart.
